The Work of Andrew Carnegie

DIRECTIONS: Read the excerpt from the profile of Andrew Carnegie. Then respond to the questions that follow.

EXPLORE THE CONTEXT: Born in 1835, Andrew Carnegie is the epitome of the “rags to riches” story. A Scottish immigrant who became part of the U.S. child labor force, Carnegie went on to make a fortune in the burgeoning steel industry. He was devoted to learning and used much of his money for philanthropic purposes. The excerpt below discusses Carnegie’s boyhood.

PRIMARY SOURCE: NEWSPAPER ARTICLE

“His father was a Scotch Liberal, a weaver of Dunfermline, and was one of three men, all weavers, who, 75 years ago, gathered their little handful of books together, and placed them at the disposal of their fellow-workmen. . . . Andrew Carnegie made application for books, and was refused on the plea that he was not a ‘working boy.’ At that time clerks, telegraph operators, and other boys and young men not employed in mills, factories, or workshops were not regarded as ‘working boys,’ and as he was a telegraph operator young Carnegie was refused the privilege of the library. At this time young Carnegie, as he subsequently confessed, had a burning desire to become a reporter and subsequent the editor of a newspaper. He did not achieve his ambition, but he has always been exceedingly ready with his pen and tongue. Stung by his rebuff at the Allegheny library young Carnegie made an attack on that institution in the Pittsburg ‘Dispatch,’ over the signature ‘Working Boy,’ with such signal success that he forced the librarian to ask an interview, at which the differences were adjusted and Carnegie was admitted to its privileges on the score of being a ‘working boy.’”
